

iFIX

Shaping the future of patient stabilization

How iFIX works

A patented micro “hook and loop” mechanism fit to match different surfaces in different medical equipment.

**REUSABLE ANCHOR
PRODUCTS**

Patches, slot adapters, patch adapters and/or side-rail adapters serve as an anchor to securely hold the fleece products. Each anchor can hold the fleece for over 1.000 procedures.

+

**DISPOSABLE
FLEECE PRODUCTS**

Super-strong, stretchy, and biocompatible fleece comfortably contours the patient's body like a second skin.
